List of Allowable Expenditures for NSGP Program

Below is a partial list of allowable expenditures for the Nonprofit Security Grant Program. Please note that the items highlighted in yellow are the categories most appropriate for your institution.

14CI-00-COOP - System, Information Technology Contingency Operations
Back-up computer hardware, operating systems, data storage, and application software necessary to provide a working environment for contingency operations. May be a purchased remote service or a dedicated alternate operating site.

14EX-00-BCAN - Receptacles, Trash, Blast-Resistant
Blast-resistant trash receptacles.

14EX-00-BSIR - Systems, Building, Blast/Shock/Impact Resistant
Systems to mitigate damage from blasts, shocks, or impacts, such as column and surface wraps, wall coverings, breakage/shatter resistant glass, window wraps, and deflection shields.

14SW-01-ALRM - Systems/Sensors, Alarm
Systems and standalone sensors designed to detect access violations or intrusions using sensors such as door/window switches, motion sensors, acoustic sensors, seismic, and thermal sensors. May also include temperature sensors for critical areas.

14SW-01-ASTN - Network, Acoustic Sensor Triangulation
A network consisting of some number of deployed acoustic sensors and one or more processing nodes for data integration and analysis. Such networks can be "tuned" to one or more ranges of frequencies to detect sounds such as gunshots, heavy weapons discharge, explosions, MANPAD launches, vehicle noises, etc., and utilize acoustic triangulation to provide accurate location data. Such networks can be wired, wireless, or hybrid, and are capable of operation near critical infrastructure assets or in wide areas.

14SW-01-DOOR - Doors and Gates, Impact Resistant
Reinforced doors and gates with increased resistance to external impact for increased physical security.

14SW-01-EXTM - System, Fire Extinguisher Monitoring
System for monitoring the presence and pressure of fixed-location fire extinguishers to ensure that they are usable and are not stolen for possible misuse.

14SW-01-LITE - Lighting, Area, Fixed
Fixed high-intensity lighting systems for improved visibility in areas such as building perimeters and surveillance zones.

14SW-01-LRHW - Long Range Hailing and Warning Device
Long range hailing and warning device capable of producing highly directional sound beams, allowing users to project warning tones and intelligible voice commands at great distances. LRHW may be interconnected to other surveillance, warning, access or intrusion control devices into an integrated system.

14SW-01-PACS - System, Physical Access Control
Locking devices and entry systems for control of physical access to facilities.

14SW-01-SIDP - Systems, Personnel Identification
Systems for positive identification of personnel as a prerequisite for entering restricted areas or accessing information systems.

14SW-01-SIDV - Systems, Vehicle Identification
Systems for identification of vehicles, ranging from decals to radio frequency identification (RFID) or other transponder devices.

14SW-01-SNSR - Sensors/Alarms, System and Infrastructure Monitoring, Standalone
Standalone sensors/alarms for use on critical systems or infrastructure items (security systems, power supplies, etc.) to provide warning when these systems fail or are near failure.

14SW-01-VIDA - Systems, Video Assessment, Security
Camera-based security systems utilizing standard, low light, or infrared technology.

14SW-01-WALL - Barriers: Fences; Jersey Walls
Obstacles designed to channel or halt pedestrian or vehicle-borne traffic in order to protect a physical asset or facility.

15IN-00-PLSN - System, Pulsed Neutron Activation, Non-Invasive
Screening system utilizing pulsed neutrons. Non-destructive detection of CWAs in sealed containers.

15IN-00-RADR - Radar, Ground/Wall Penetrating
Radar systems designed to penetrate walls or ground to allow detection of hidden objects.

[15IN-00-XRAY - System, Mobile Search & Inspection; X-Ray](#)
Portable X-Ray systems for use in search and screening operations.

[15SC-00-PMON - Monitors, Portal](#)
Systems to scan vehicles/cargo for radioactive content. Various sizes for vehicles, packages (large and small) and pedestrians. Does not identify radionuclide. Note: For explosive detection portal, see Item 07ED-03-PORT. DIQCode: [D,Q]

[15SC-00-PMSP - Monitor, Portal, Spectroscopic](#)
Systems to scan vehicles/cargo for radioactive content and identify source radionuclide. Variants include vehicle, rail, and seaport container configurations. DIQCode: [D,I,Q]

[15SC-00-PPSS - Systems, Personnel/Package Screening](#)
Hand-held or fixed systems such as walk-through magnetometers and conveyor-belt x-ray systems used to screen personnel and packages for hazardous materials/devices.
