

# Protect Your Community. Not Just Your Data.

Brought to you by CJP in partnership with Wizer –  
Free access for eligible organizations

## 👤 From Data Breaches To Physical Harm

Cyber threats don't just stay online. For Jewish nonprofits and community organizations, they can lead to real-world harm. Criminals aren't only after financial data, they seek:

- **Event details and locations** to disrupt or harass gatherings
- **Donor names and addresses** to target individuals
- **Volunteer systems** as easy entry points into your network
- **Leadership emails** to impersonate and deceive the community

When even one person makes a digital mistake, the consequences can extend far beyond the screen. That's why physical security today begins in digital spaces.

## 👤 Train Your Team With Wizer, For Free!

Wizer's security awareness training helps your staff recognize and prevent online threats that can lead to real-world consequences.

If you're an eligible Jewish nonprofit, you can get full access at no cost.
